

Service

eePulse Proprietary Implementation

Our implementation teams pride themselves in high quality, research-proven strategies that can be delivered within days or weeks. We have even completed a 24-hour implementation process to meet the needs of a new CEO who wanted to get started with real data during his first week on the job.

Rollout Strategy For Managers

- Receive top down implementation.
We start with top-level managers, demonstrate the value, get buy-in, and then train next-level managers on the use of the data. This ensures each level has the education and commitment required for process success.
- Train and educate.
We use managers' "live" data to make their experience real and timely.

Five Steps

- Metrics Strategy
Assess key business priorities with customized metrics.
- Education
Receive well-developed, timely and responsive technology and management process education.
- Communication/Marketing
Advertise wins with best practice communication strategies that assure clear communication and expected results.
- Action
Use action strategies that result in clear return on investment through immediate improvement in efficiency, productivity, relations, and sales.
- Continuous Learning
Train to use people data to continuously learn because data-driven leadership is key to the success of your firm.

Technology Strategies

- Get started right away with easy-to-use solutions.
- Receive Help Desk support for everyone.

Responsiveness

- Obtain weekly support from your client development and services team.
