Datatel Partners with eePulse to Provide Strategic Data and Dialogue-Driven Leadership Tools for Employee Engagement

Partnership Provides Institutions with Employee Surveys, Leadership Communication, and Action Planning Tools

FAIRFAX, VA – June 7 –Datatel®, Inc. announced today a partnership with eePulse, a hosted Internet survey solution that helps human resources professionals obtain a high performance, engaged workforce while also providing tools to evaluate and strengthen services provided by human resources. eePulse’s comprehensive solution includes pre-populated, well-researched and predictive questions that measure employee energy, engagement, satisfaction, issues, and productivity.

eePulse was founded by Dr. Theresa M. Welbourne, president and CEO of eePulse, Inc. and an adjunct professor of Executive Education at the Ross School of Business, University of Michigan. eePulse's solution is built upon key findings from Dr. Welbourne's research. In her studies, she demonstrates the direct effects of leadership and HR management strategies on organizational survival and performance.

“Partnering with eePulse provides our clients access to a strategic HR survey solution,” said Tracy Williams, Datatel’s human resources product manager. “We are always seeking and evaluating referral services that provide complimentary, value-added solutions to our clients, and eePulse is clearly the best choice for a survey tool that helps institutions achieve increased performance of their workforce.

According to Dr. Welbourne, the eePulse team “looks forward to expanding their services in the higher education market, where real-time, benchmarking data is well respected and where the solution will help human resources professionals develop quality metrics skills that ensure their institution’s success.”

Dr. Welbourne’s research has been featured in publications such as The Wall Street Journal, BusinessWeek, and The New York Times. Welbourne’s work has been published in several journals, including the Academy of Management Journal, Human Resource Planning, Compensation and Benefits Review, Group and Organization Management, and Journal of High Technology Management Research.
